

**ANSC 5694: ANIMAL SCIENCE SEMINAR SERIES
SPRING 2017**

George White Building, Room 209

Fridays at 12:20 PM

Jan 20

Bill Fields, Biological health and Safety Specialist
EH&S, UConn
"Biological Considerations in Farm Animal Research and Production" (training)

Jan 27

Students meet with Dr. Amalaradjou (Rm 103)

Feb 3

Brent Lewchik, Chemical health and Safety Specialist
EH&S, UConn
"Lab Safety and Chemical Waste Management" (retraining)

Feb 10

Dr. Jason Parent, Assistant Professor
Department of Natural Resources and The Environment, UConn
"Stormwise: Reducing power outages by creating healthy roadside forests"

Feb 17

Dr. Melissa McKinney, Assistant Professor
CESE/Department of Natural Resources and The Environment, UConn
"Climate change-contaminant interactions in Arctic top predators"

Feb 24

Dr. Kelly Burke, Assistant Professor
Department of Chemical and Biomolecular Engineering, UConn
"Silk conjugates as functional biomaterials"

Mar 3

Dr. Richard Dunn, Associate Professor
Department of Agricultural and Resource Economics
TBA

Mar 10

Dr. Sivapriya Vanaja, Assistant Professor
Department of Immunology, UCHC
'Bacterial modulation of innate immune responses'

Mar 17

Spring break

Mar 24

Dr. Hannes Baumann, Assistant Professor
Department of Marine Sciences, UConn
TBA

Mar 31

Yuqing He, MS Student
Department of Animal Science, UConn
"Effect of season on travel pattern, hoof growth and muscle growth of domestic young horses"

Apr 7

Abraham Pellissery, PhD Student
Department of Animal Science, UConn
TBA

Apr 14

Christina Nishimura, PhD Student
Department of Animal Science, UConn
"Antibiotic resistance profiles of *E. coli* and Enterococci isolated from retail meat in Connecticut"

Apr 21

Dr. Young Tang, Assistant Professor
Department of Animal Science, UConn
"Developing livestock pluripotent stem cells and targeting PRRS disease pathways"

Apr 28

Stephanie Barnes, PhD Student
Department of Animal Science, UConn
"Control of *Listeria monocytogenes* in dairy products"
